Art Unit: 1745

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a first non-aqueous battery, classified in class 429, subclass 231.8.
 - II. Claims 13-24, drawn to a second non-aqueous battery, classified in class 429, subclass 324.
 - III. Claims 25-31, drawn to third non-aqueous battery, classified in class 429, subclass 231.8.

Even though applicant may traverse the above restriction requirement, applicant is still required to elect one of the above groups.

2. The inventions are distinct, each from the other because: Group I requires the specific diffraction patterns of the graphite powder, which features are not part of either the Group II or Group III battery. In addition, the Group III battery is laminated and requires a pressing step for the manufacture thereof, which features do not form part of the Group II battery.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
